iPipeline's **iGO Evolve®** modernizes how carriers design, launch and maintain life insurance e-Applications. Built on the powerful iPipeline platform, iGO Evolve transforms the traditional, heavy customized e-App development cycle into fast, configurable, and reusable digital experience.

This next-generation framework offers out-of-the-box life products, robust workflows, pre-built integrations and low-code tools-empowering carriers to launch products faster, reduce maintenance costs, and deliver seamless digital experiences across distribution.

FEATURES

- Out-of-the box life product templates
- Low-code configuration tools for rules, validations, and workflows
- API-enabled flexibility and headless options
- WCAG-compliant modern user experience
- Pre-built integrations across iPipeline solutions
- Common case dashboard
- Reusable, standardized components
- Self-maintenance toolkit

BENEFITS

- Reduce time to market with reusable components
- Lower maintenance costs through standardization
- Increase customer independence via low-code tools
- Improve user experience with modern UI
- Strengthening branding control with API customization
- Boost operational efficiency
- Prepare for growth with scalable architecture
- AI/Data-ready foundation
